Perisher Historical Society

NEW Publication

"Hotel Kosciusko"

The history and legacy

of Australia's first planned alpine resort

Dear Friend of Perisher Historical Society,

We are delighted to present an important book documenting this wonderful building which was so important to the growth of skiing in Australia.

The author, Donald Johnston, invested seven years of research to provide this fascinating insight into the history of the building, the life and times of the period, its guests, the staff, and the activities of running an isolated hotel. Fascinating too is the documentation of the hotel's devastating demise by fire. Heroic feats to rescue the guests of the fully booked hotel.

This is a 'must-have' read for those that love the sport and demands to be on the bookshelves of all ski clubs and alpine hostellers.
