

# OVER SNOW VEHICLE

## INFORMATION

### USE OF AN OVER SNOW VEHICLE (OSV) BY LICENCED DRIVERS

- The OSV is registered with Office of Environment & Heritage (formerly NPWS) as a Guthega Over Snow Vehicle.
- The machine is conditionally registered with Roads and Maritime Services (formerly RTA) for occasional operation on public road however the OEH regulations take precedence over
- Driving on sealed roads without snow will hasten track wear but cannot be avoided in our situation at Guthega, limiting as much as possible operation on surfaces other than snow will help to extend track life.
- Recreational use of the OSV is banned in the National Park. Every trip in the machine must have a legitimate reason for happening that assists in the operation of the lodges.
- Transferring children and equipment to the roadway in front of the Australian Ski Club is a legitimate use of the machine so long as it is returned immediately to in front of either lodge for the use of the next person who requires it. The OSV must not be operated beyond the Australian Ski Club.
- Taking the garbage to the hoppers, inducting and training new drivers or taking people and their gear to and from the Tate Rd turn around are all legitimate uses of the machine. Driving beyond this limit is not permitted, i.e. it must not be driven to the overnight carpark or in the terminal carpark.
- The supplier of the machine has warned us against towing bogged cars with the OSV because in his experience this will dramatically shorten the life of the machine and can become dangerous for people in and around the towed and towing vehicle. Accordingly towing of cars, sleds etc. with the OSV is not permitted.
